

## Nuka<sup>GT</sup>

The Nuka GT is relatively short at 5.05 meters but despite its length it has a very effortless glide and great acceleration. The Nuka GT has a speed optimized hull and soft chine's, the hull is rounded for less resistance and less wet surface making the Nuka GT glide effortlessly through the water.

The Nuka GT is a touring version of the popular Nuka model. It has a more practical deck line layout. The rear hatch is oval making it easier to load the kayak on overnight trips. The GT has less rocker and more raking bow and stern which increases the waterline when loaded. The GT is still a nimble kayak and it is slightly faster and has better acceleration than the Nuka. The Nuka GT can easily be fitted with a rudder for those who prefer to focus on forward momentum rather than on correcting strokes and edging.

The GT has been very popular since it was introduced in spring 2012. Especially the carbon version weighing around 19 kg is very attractive to those who handles their kayak alone.

### Standard accessories:

- Oval rear hatch, 20 cm Day hatch, 15 cm knee hatch, 24 cm front hatch
- Kajak Sport Click on hatches
- Reflective shock cords
- Retractable Skeg
